

Model No: DPPR-0008

Battery Deep Discharge Protection System

Especially Designed for protecting battery bank from deep discharge problem. It often happens during the night hours, when due to slit negligence of the maintenance personnel of the telecom operators monitoring of voltage level becomes down. This system efficiently observes all the related parameters, compares with the standard values and then operate.

Model: DPPR-0008

Battery Deep Discharge Protection System A

Product of DPPR Systems (P) Ltd. *An ISO 9001:2008 Certified Company*

- 1: Programmable Battery disconnection range from 42Volt to 47 Volt
- 2: Password protection for unauthorized setting
- 3: Auto Re-Storing after 50Volt.
- 4: Digital Voltmeter for Battery Bank monitoring.
- 5: LCD Display 16*2 for showing all parameter.

Especially Deigned for BSNL ,Airtel Site Rural and urban BTS /Exchange.
